-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 6, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang. The Huang reference discloses the utilization of a method for filtering for acoustical signals, comprising the steps of: (c) defining a maximum signal profile, said maximum signal profile being an upper envelope (20) of said receive signal (10); (d) defining a minimum signal profile, said minimum signal profile being a lower envelope (30) of said receive signal (10); (e) defining a midpoint reference signal (40) between said maximum signal profile (20) and said minimum signal profile (30); and (f) subtracting (see paragraph 0219) said midpoint reference signal (40) from said receive signal (10) to generate a filtered signal as recited in claims 1 and 6. The difference between

the Huang reference and the claims is that the claims recite the utilization of pulse echo data. The Huang reference teaches that it was well known in the art to utilize his invention to process any acoustical signals representative of real world phenomenon (see paragraph 0006). It would have been obvious to modify the Huang reference to process pulse echo signals as motivated by the Huang reference to enable the Huang system to enhance pulse echo data.

With regards to claims 2, 3, 9 and 10 the Huang reference discloses defining the midpoint reference signal (40) as the mean (average) of said maximum signal profile (20) and said minimum signal profile (30).

3. Claims 4, 5, 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Pihulic whose telephone number is 703-306-4168. The examiner can normally be reached on Monday through Thursday from 7 a.m. to 5 p.m. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Tarcza, can be reached on 703-306-4171.
